

Welcome to the National Wine Centre of Australia.

Although a wine list is usually supposed to provide clarity to a drinker's decision making, we give you fair warning that reading this will most likely add to the confusion. Fear not, our staff know how to spell and use grammar when required, but with 120 white, rosé and red wines available by the glass, as well as a decent smattering of well-chosen sparkling, sweet and fortified options we wish you the best of luck in this endeavour.

Our advice is simple! Walk around our Wined Bar and look at all our pretty and enticing bottles and select something that jumps out at you and says "Drink me," but not in the *Alice in Wonderland* likely to shrink way but definitely in the *Alice in Wonderland* you will be taken on an amazing journey kind of way.

Enjoy!

"If I ever found a pot of gold

I'd buy bottles untold of the nectar of the vines

'Cause I'm going to die with a twinkle in my eye

'Cause I sung songs, spun stories, loved, laughed, and drank wine"

The Cat Empire, 2003

Blind Tasting

For those with the flutter of adventure or those who take games of Monopoly way too seriously we have the perfect challenge for you.

We have dedicated 16 wines to those of you who love to throw down the gauntlet. With eight white and eight red wines to choose from, chance your hand at a guess or two to see how knowledgeable you are when it comes to the nectar of the vines.

Here are the parameters;

- All wines are from Australia
- They could be single varietals or blends
- Our sommelier will try and trip you up

This is educational with the aim to teach you how to blind taste. Answers will be given by staff once you have written your answers.

So see our staff for a set of questions to answer, pull up a pew and stick your nose in the glass and have a stab in the dark and regardless of your guess, answer with confidence!

Organic, Vegan, Biodynamic and everything else....

There has been a big push over the last few years for organic, biodynamic, vegan or sustainable produce. We have made the conscious decision to identify those that adhere to these standards for the ever more discerning customer. Please note that our position is that most of the wineries we showcase are family wineries or small wineries that do this not for riches but for the sheer love of their job and the bigger wineries are equally aware of the impacts they can have on the environment. Those who are not organic or biodynamic usually have very good reason for not being so and those wineries that do use sulphur or systemic sprays only do so when they need to and not just for the sake of it.

Certified Organic – To be certified organic you can go through two organisations in Australia (ACO and NASAA) and on a yearly basis (cost is upwards of \$1000 depending on the size of your production) you have your vineyards assessed and discuss the next 12 months management plan. There is a strict list of what products you can use in the vineyard. It takes three years to achieve full certification in Australia.

Vegan – Wine in its most natural form is completely Vegan, it is fermented grape juice and they use oak, concrete, clay or stainless steel to ferment the wine which is bottled in glass with a cork or stainless steel cap. Wineries can filter or fine their wine with egg whites, skim milk powder, gelatine or Isinglass (sturgeon swim bladder gelatine). If they do not use these methods then their wine will be vegan.

Biodynamic- Created by Rudolf Steiner in 1924, this is a form of agriculture that emphasises the use of manures and composts and treats animals, soils and crops as a single system. The principle also focuses on a planting calendar based on phases of the moon broken into root, leaf, flower and fruit days. Wineries need to go through similar processes with certification as applied in the Organic certification process.

Sustainable- This applies to people who practice biodynamic or organic methods but do not choose to be certified. Ron Laughton, Jasper Hill *"I'm not certified, and I don't wish to be", explains Ron, "I can stand up with my hand on my heart and say I've been doing it for nearly 40 years... I think those that are using chemicals on their vineyard should be licensed. Why should I be certified to be clean, and do nothing harmful in my vineyard?"*
